

# ARCTIC BUSINESS

2014 BODØ, NORWAY  
8-10 OCTOBER

[CLICK TO REGISTER](#)

## Down to business at the top of the world

Welcome to a unique, multi-day event that provides an arena for dialogue that leads to achievable action for business in the Arctic.

The time is right for business voices to become a central part of the dialogue. Arctic Business establishes a meeting place for businesses to come together to shape the way forward.

## Across industries and disciplines

Cooperation is the key to success in the region – working together and sharing knowledge, best practices and ideas. Arctic Business facilitates this by gathering players from different countries, industries and companies.

Business leaders from the oil and gas, minerals, seafood and maritime sectors will address cross-industry challenges with logistics, risk management and competence. Telecommunications; safety; search and rescue; human resources; and infrastructure are other areas that will be discussed.

## Hands-on

Arctic Business provides a hands-on, action-oriented approach. Its mix of activities lays the groundwork for engaging all participants and ensuring that the arena moves beyond good conversations to concrete results.

To support continuation of action after the event, all presentations will be filmed and published on YouTube.
